Carlsson, Gösta E.
SOME INVESTIGATIONS OF PAPERS AND INKS IN
CONNECTION WITH A PRACTICAL PRINTING TEST.
19 Dec 60, 6p. (4 figs. omitted).
Order from SLA mi\$1.80, ph\$1.80 61-10412

Trans. of Grafiska Forskningslaboratoriet.
[Meddelanden] (Sweden) 1959, no. 42, p. 18-23.

In a letter press print shop several papers and inks of
the same type but of different makes were subjected to
a practical printing test on the same job. Remarkably
large differences in possible printing speed with re-
gard to the picking of the papers were found. The sur-
face bonding strength of the papers was tested with the
Dennison wax test and the LTP pick tester. Relatively
good correlation was found between the practical re-
sults and the Dennison test but not with the pick tester.
The surface strength of the papers seemed to stay in
reverse proportion to their ash content. The inks were
tested on the Inkometer and the results correlated well
(Materials--Paper, TT, v. 5, no. 12) (over)
